

Q: Can I use the antenna also in the harbor? MARINE PRODUCT only

A: Yes, of course. But you have the possibility to change into the Harbormode. In this case the tracking will be switched off and the noise of the antenna is very much reduced. To do so, go to the SETUP-Menu and switch the menuitem TRACKING to OFF. Please consider, that motions of the boat are not compensated and it is possible that the picture on the screen sometimes deteriorates. To switch on the tracking again, switch TRACKING back to ON.
